DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 26-32, drawn to a method and system for processing requests using metadata information, classified in class 707, subclass 2.
- II. Claims 14-17 and 22-25, drawn to a system for cataloguing information, classified in class 707, subclass 7.
- III. Claims 18-21, drawn to a data structure for describing data stored in an information repository, classified in class 707, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn to a method and system for processing requests using metadata information, Group II is drawn to a system for cataloguing information, Group III drawn to a data structure for describing data stored in an information repository. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
